

Hospital Information Management System

Powered By : Konnectogrow, Pune.

Introduction:

The Hospital Management System (HMS) is designed for Any Hospital to replace their existing manual, paper based system. This System targets to provide complete solution for Hospital and Health care services.

This System can be used in any Hospital, Clinic, Diagnostics or Pathology labs for maintaining patient details and their test results.

It Integrates the entire Resources of a Hospital into One Integrated Software Application.

Features

Useful for

1. Large, Medium Hospitals and Nursing Homes
2. Physicians, Surgeons, Gynecologist.

Generate Prescriptions in less than 60 seconds.

Multi-user, LAN, Online and Offline Compatible

Compatible with any Windows 7 or higher version.

SMS Facility.

Patient ID card with barcode for Patient ID

Benefits

Minimize hand written work from admission to Discharge of patient and Final Billing.

It helps you to minimize your repeated works and take care of the complete functionality of your hospital.

It is huge time saver and really facilitates proper communication among the management, staff and the patient parties.

Daily collection report.

Conclusion

The project Hospital Management System (HMS) is for computerizing the working in a hospital. The software takes care of all the requirements of an average hospital and is capable to provide easy and effective storage of information related to patients that come up to the hospital.

It generates test reports; provide prescription details including various tests, diet advice, and medicines prescribed to patient and doctor. It also provides injection details and billing facility on the basis of patient's status whether it is an indoor or outdoor patient.

The system also provides the facility of backup as per the requirement.

A close-up photograph of a person's hand holding a small, rectangular, cream-colored sticky note. The hand is positioned in the center of the frame, with the thumb and index finger gripping the edges of the note. The person is wearing a light blue, long-sleeved button-down shirt, which is visible in the background and slightly out of focus. The sticky note has the words "Thank You" written on it in a black, cursive script. The background is a plain, light-colored surface, possibly a wall or a table, which is also out of focus. The overall lighting is soft and even, highlighting the texture of the skin and the paper.

Thank
You
